Volume 146 September 1984

CONTENTS

Oblique wave groups in deep water. P. J. Bryant *page* 1

The emergence of isolated coherent vortices in turbulent flow. James C. McWilliams 21

Simulation of Taylor–Couette flow. Part 1. Numerical methods and comparison with experiment. Philip S. Marcus 45

Simulation of Taylor–Couette flow. Part 2. Numerical results for wavy-vortex flow with one travelling wave. Philip S. Marcus 65

Instabilities of convection rolls with stress-free boundaries near threshold. F. H. Busse and E. W. Bolton 115

A unified description of two-layer flow over topography. Peter G. Baines 127

Sink effect in a shock-induced boundary layer on attenuation. B. E. L. Deckker 169

Theoretical study of the transonic flow past wedge profiles with detached shock waves. Michel Abboud 181

Asymmetric flow between parallel rotating disks. C.-Y. Lai, K. R. Rajagopal and A. Z. Szeri 203

A potential-flow theory for the dynamics of cylinder arrays in cross-flow. M. P. Païdoussis, D. Mavriplis and S. J. Price 227

Self-consistent effective-medium parameters for oceanic internal waves. R. J. DeWitt and Jon Wright 253

Evolution of the flow field associated with a streamwise diffusing vortex. C. Frederick Pearson and F. H. Abernathy 271

Nonlinear Faraday resonance. John W. Miles 285

Mass transport in a turbulent boundary layer under a progressive water wave. S. J. Jacobs 303

An alternative approach to linear and nonlinear stability calculations at finite Reynolds numbers. F. T. Smith, D. Papageorgiou and J. W. Elliott 313

A numerical study of vortex interaction. I. G. Bromilow and R. R. Clements 331

On the stability of the unsteady boundary layer on a cylinder oscillating transversely in a viscous fluid. Philip Hall 347

Reflection of a shallow-water soliton. Part 1. Edge layer for shallow-water waves. N. Sugimoto and T. Kakutani 369

Wake-induced galloping of two interfering circular cylinders. A. Bokaian and F. Geoola 383

Proximity-induced galloping of two interfering circular cylinders. A. BOKAIAN and F. GEOOLA 417

High-Reynolds-number viscous flow in collapsible tubes. O. R. TUTTY 451

INDEX TO VOLUME 146 470
